Digging Deeper…

OCTOBER 6, 2015
What other inputs do we need to consider?

- Cancer Care Ontario Regional Systemic Plan
- Aboriginal Cancer Strategy III and the DRAFT South West Regional Cancer Program Aboriginal Cancer Care Plan
- Health System Funding Reform and Quality Based Procedures Implementation
Systemic Treatment Provincial Program Plan

Goals:
*Extend the Quality and Safety Agenda*
*Strengthen and Enable Care Models*

**Strategic Priorities:**
1. Extend the quality and safety focus from parenteral to oral chemotherapy
2. Improve emergency room utilization through enhanced toxicity management
3. Ensure consistency in access and quality of chemotherapy in the Home
4. Ensure standardization within community pharmacies.
5. Expand the system’s ability to monitor and evaluate
6. Enhance coordination and communication to improve person-centred care
7. Enable new models of care
8. Strengthen regional capacity
9. Develop and implement patient based funding model
Aboriginal Cancer Strategy

Aboriginal Cancer Strategy III
2015–2019

together we will

South West Aboriginal Cancer Plan
2015-2018

South West Regional Cancer Program
Cancer Care Ontario
2015-2018

- Education
- Build Productive Relationships
- Palliative & Supportive Care
- Research & Surveillance
- Screening
- Prevention
Core Aboriginal Health Tables

Surgical QBPs implemented and/or planned:

- Gastrointestinal: Colon, Rectal, Stomach,
- Hepatobiliary: liver, biliary, pancreas
- Thoracic: Lung, esophagus
- Ophthalmic
- Head & Neck
- Sarcoma: Bone, Soft Tissue
- Neurology: brain, spinal
- Skin (including melanoma)
- Breast Cancer
- Thyroid
- Genitourinary: kidney, bladder, testis, adrenal gland
- Prostate
- Gynecology: Endometrium, Cervical, Ovarian, Vulvar
Key Enablers to our Regional Planning

1. Patient engagement, consultation and co-design
2. Equity assessment
3. Innovation in technology
4. Evidence Informed decision making
We will keep patients healthier, more engaged and better informed throughout their cancer journey.

Tactics:

- Standardized response to oncologic emergencies
- Better management of symptoms
- High quality palliative care
- Information technology and information sharing
- Common clinical care standards for home and community based care
- Frailty screening and interventions
We will improve patient experiences and outcomes for colon and rectal cancer patients from suspicion of disease through active treatment.

Tactics:

• Develop new systems focused on reducing waits and informing “next steps”
• Advance MCCs and access to timely electronic clinical information
• Develop on-line regional practitioner inventory
• Sustain and expand existing GI Endo Quality Improvement framework.
• Implement and monitor compliance to clinical pathways for diagnosis and treatment
We will improve patient experiences and outcomes for skin cancer patients from suspicion of disease through active treatment.

Tactics:

- Develop a regional practitioner inventory
- Develop partnerships and communities of practice
- Develop and implement clinical care pathway
We will ensure Diagnostic Imaging and Molecular Pathology Services in support of Cancer Patients are appropriately utilized and optimized.

Tactics:

• Regional Imaging Service Delivery Plan
• Define role of Interventional Radiology
• Reduce duplicate testing and improve efficiencies
• Improve access to molecular testing.
We will promote person centred care and the active involvement of patients and families in all aspects of our cancer system.

**Tactics:**

- Implement Person Centred Care guideline
- Promote innovation and research
- Undertake form Health Equity analysis in screening and diagnosis
We will ensure sustainability and continuously improve the quality of our cancer care services across the South West.

**Tactics:**
- Regional Systemic Therapy Quality Improvements
- “Choosing Wisely” guidelines
- Increase utilization of radiation and chemotherapy in select areas
- Increase participation in clinical trials
- Extend quality and performance management framework to other services areas
- Peer review quality assurance
We will optimize all specialized programs to ensure full effectiveness within the Region and across all affiliate provider sites.

**Tactics:**

- AYA improvement initiative
- Regional oversight infrastructure development
- Fully implement organizational standards for designated lead and affiliate programs/sites
- Align all programming with CCO provincial program expectations
Now it is your turn!
Table Instructions #1

Please select 2 strategies for further discussion. At your tables, please consider the following questions: (30 min discussion)

- Is this direction clear enough? Does it address an identified issue? What barriers are we likely to encounter as we move forward? How we will overcome these?

- Are there any additional ideas or tactics that we should consider to address the objective?

- Do these conversations prompt other ideas that have not yet been considered?

Please assign one person from your table to do a brief (2 – 3 min for each strategy) report out of your discussion.
Please consider the recommendations for Cancer Care from the Choosing Wisely document found on your table. : (15 min discussion)

Are there recommendations found on this list that should be considered “must dos” across the South West and should be implemented immediately?

Are there recommendations that are not possible or should be excluded from further consideration?

Please rank these recommendations in terms of implementation priority, with 1 being immediate to 10 being not to be considered at all.

Please assign one person from your table to do a brief (2 – 3 min) report out of your discussion and rationale for your ranking.
Other thoughts and considerations

General feedback on the SWRCP 2016-2019 Plan as presented today:

• Does this plan address the overarching principles and values we espouse to?

• Are we being clear and directional enough in our strategies?

• Of the strategies not discussed in detail today, are there any other thoughts, ideas or impressions that you wish to share?
Thank you!
